

POWERFUL

Advanced Fertility AND Gynaecology CENTRE

ADVANCING SOLUTIONS WITH CARE

Its location in the heart of South Delhi with ease of accessibility is Advanced Fertility and Gynaecology Centre's added advantage apart from its ethical and patient-centric approach. Going from simple to complex, designing detailed customized solutions for the patients coupled with tender loving care ethics, the centre is a multi-specialty facility with well-qualified Gynaecologists, Embryologists, Ultra Sonologists and Andrologists on roll. Maintaining regular interaction with global premier IVF and research centres so as to receive a steady inflow of updates on the latest procedures and techniques in the field, the medical team at the centre is well-qualified and competent, and having completed more than 5,000 IVF cycles, is also a regular attendee at global seminars for additional insights on diagnosis and treatment of infertility. Under the quintessential leadership of Clinical Director Dr Kaberi Banerjee, who is one of the most renowned faces in the IVF industry in the country today and is acclaimed for creating a revolution in this sector, the centre is consistently

setting new benchmarks of success. Established in 2011, the Centre is thriving on Dr Banerjee's expertise in IVF as she possesses more than a decade long experience in the field and has conducted more than 53,000 IVF cycles so far and specializes in repeated IVF failures, donor and surrogacy. Moreover, being a well-acclaimed writer in the medical field with her articles occupying prominent spaces in international journals, she has many a times mesmerized international audiences with her oratory skills and presentations and is also an esteemed member of the National Academy of Medical Sciences (MNAMS) and the founder and organizing chairperson of CUPART (Current Practices and Recent Advances in ART), an international organization facilitating right treatment and research in fertility & IVF.

BROAD SPECTRUM OF SERVICES

Advanced Fertility and Gynaecology Centre (AFGC) boasts of a multitude of services like Intra Uterine Inseminations, IVF, ICSI, FERC, Operative Laproscopy and Hysteroscopy, IUI, Blastocyst, donor services (embryo/egg/sperm), Laser Assisted Hatching, Embryo Transfer, pre-genetic diagnosis, PESA, TESA, TESE, reproductive surgeries and surrogacy programs among others. AFGC also has the state-of-the-art embryology laboratory where major procedures like In Vitro Fertilization (IVF), Intracytoplasmic

Sperm Injection, Blastocyst Culture, Assisted Hatching, Pre-implantation Screening and Diagnosis are performed with strict surveillance over the readings of vital parameters in terms of air purity and temperature, and hygiene is maintained in accordance with international norms. In addition, the vitrification of sperms, oocytes as well as embryos is done for future use in a separate room in the laboratory. The centre is equipped with an ultra modern birth center running under supervision of experienced obstetricians and a separate spermatorium with modernized Andrology & culture room facilities are also available along with an advanced fetal medicine unit to provide post pregnancy care to the patients.

DISSEMINATING KNOWLEDGE

Having acquired valuable and extensive experience in the field of IVF, Dr Banerjee is bent on sharing her pearls of knowledge with other professionals and under her stewardship the centre offers a number of training courses and provides a range of extensive study material for hands-on training of each technique. Accredited with FOGSI, the centre is a world-class institute, facilitating hands-on-training and holds the credit of training more than 100 doctors worldwide. All the practical knowledge and experience gained by using the world-class equipment available at the centre is quickly assimilated by the learners and can be applied directly in everyday cases.
