

POWERFUL

# Dr Yogi's Clinic

## DISSEMINATING BLESSINGS

Established in the year 1944, Dr Yogi's clinic is one of the best sexology and infertility clinics for men across the world. With the experience of doctors working at the clinic and the vision of Late Vaid Harbhajan Singh Yogi, the clinic has successfully treated millions suffering from intimate sexual and infertility disorders.

Understanding that sexual and infertility disorders can be nightmares for married people, and can also cause

mental illnesses or other diseases, Dr Yogi's Clinic was established to help such people live a fulfilled life. India has always been a country where sexual disorders are not discussed in public life but Dr Yogi's Clinic has succeeded in changing the perception of the patients who now very frankly discuss their intimate disorders with the doctors.

## THE JOURNEY OF RAISING HOPES

The clinic has had a journey of more than six decades through which they have not only proved that they are the best in their field but have also brought light in the lives of couples who had lost all hopes of parenthood and a happy married life. The clinic has gained a reputation worldwide with their painless, swift and affordable treatment methods, has created unparalleled trust in the minds of clients, and therefore has been reaping the reward of serving the patients for several generations. The doctors at

the clinic do not merely focus on the treatment but also use detoxification, rejuvenation and proper diet while the treatment is in progress.

The treatments are solely based upon ayurvedic methods so they are completely free of intoxicants, steroids or chemicals, and there is no question of side effects. The expert panel of doctors at the clinic brings out the best in the patients, and is dedicated to the service of patients. The clinic has created a worldwide medicine platform, and an online chat platform for patients who cannot physically reach the clinic; special doctors are dedicated to this cell.

## VISION FOR A BETTER TOMORROW

With a vision to help people lead a healthy and happy life, Dr Yogi's Clinic is constantly working to make the treatment even more effective by conducting several researches. Doctors at the clinic believe that it is important to have a 'sex positive' attitude where sexual problems are not a matter of embarrassment, and the clinic strictly makes sure that records

of patients are end-to-end encrypted. Even after the patient is cured the clinic maintains a record which allows them to help the patient lead a healthy, happy and sexually sound life throughout.

Dr Yogi's Clinic has not only perfected the art of treating its patients in the best possible manner, but has also been playing its part in the social uplifting of people, for which the clinic regularly runs its education programmes on television, radio and social media. Doctors at the clinic have also been constantly working towards eradicating the myths related to sexual problems by spreading awareness through social camps.

The clinic is an overall example of service to the society. The noble working pattern of the clinic is backed by the morals and legacy of people who established Dr Yogi's not only as a medical clinic but also as a socially responsible venture.

## QUANTUM LEAPS
