

EMERGING

The Chintels School

NURTURING THE FUTURE

With a vision to carve complete personalities and transform students into good human beings, The Chintels School has set new benchmarks in the field of education and is constantly working towards their holistic development. The Chintels has turned out to be a place where knowing and understanding has a pivotal role and not just rote learning.

Established in the year 1989 by the visionary Ms. Anurag Vij, the school has become the perfect destination for

parents who want their kids to have a bright future. The school was set up with an idea, a vision and a dream to impart quality education and provide an all-round developing environment with the motto "Always More, Always Better", of Jyoti (light), Preeti (love), Neeti (justice) and Shanti (peace) and over the years the school has been successful in offering nothing but the best.

TRACING THE JOURNEY

When the school was set up in the late '80s, compulsory education had a mixed response in the country and private schools were not considered the best place for a child to study in. Then emerged a school that changed the concept of imparting education, where teaching did not mean instilling a certain idea into the minds of students but letting them judge for themselves.

Though the days have changed, the challenges have not been eliminated

from the education system, rather competition and the pressure to perform has increased manifold. Understanding the modern-day needs of the children, The Chintels School has evolved its approaches and created a mix of traditional and digital learning so that its students excel in their respective fields..

LETTING THE TALENTS BLOOM

Because it is important for a student to believe in himself/herself, The Chintels School has committed itself to focus on helping the children to have faith in their abilities and letting them follow their instincts so that in future they grow confident enough to take their decisions

and don't succumb to failures. On one hand students are taught to master the art of success in every sphere of life and on the other, they are taught the lesson of humility and acceptance.

Students' learning is encouraged through their participation in several workshops and cultural programmes organised by the school regularly, and tours to different sites of historical and cultural importance are arranged to enlighten the students with history and culture of the country. In the process, they are not only rejuvenated but also learn about varied and significant facts about the nation.

TRANSFORMING THE YOUNG FOR THE FUTURE OF THE COUNTRY

The teachers at The Chintels School are trained to impart educational lessons in a most friendly and comfortable environment, and assimilation of knowledge takes place through Chintels' unique blend of traditional classroom teaching and technology-based learning.

Apart from having state-of-the-art facilities & technologically-sound infrastructure which helps students to keep pace with the world around, the school also provides natural surroundings to keep the children close to the nature and encourages its preservation.

From academic performance to social etiquette, The Chintels School provides the best of education and ensures all-round development of its students so that they grow up to become an asset to the society and play a crucial role in the development of the country.
