

POWERFUL

With the urge of providing quality Thermo Mechanical Treatment, popularly known as TMT products, Radha TMT is continuing the Radha Group's legacy that was founded in 1960 by Late Shri Radheshyam Ji Saraf. Soon, the onus of maintaining the reputation of the Radha Group shifted on Mr. Saraf's sons, Mr. Sunil Saraf and Mr. Suman Saraf, who pledged to carry forward their father's legacy as the Chairman and the MD of Radha TMT, respectively.

SETTING NEW BENCHMARKS

Radha TMT is among the few steel plants to adopt Thermex, which is the highly acclaimed German technology, deployed in the renowned steel plant units of the country. It leverages advanced machinery combined with Thermex technology for manufacturing the best-ever TMT bars to offer a strong foundation to the big superstructures. The German technological solution makes Radha TMT the leading manufacturers of robust, unimaginably ductile, superbly weldable, and easily bendable TMT products, including TMT Steel bars.

With highly advanced rolling mills accompanied by the steel melting induction furnaces and continuous casting machine, Radha TMT has become a hub of high-quality primary steel across the nation. The TMT Bars, MS Squares, Plain Rounds, and MS Flats manufactured by the steel plant are setting new and more advanced industry standards for the growing market in India.

EMERGING AS A MARKET LEADER

Located in India's pearl and diamond trading centre—Hyderabad, Radha TMT – the

INFRASTRUCTURE

RADHA TMT

PROVIDING A STRONG FOUNDATION TO THE NATION

Radha TMT, known for top-notch renovations, quality workmanship, neat finish, & robust builds have been providing a strong foundation to structures in India. It not only complies with the industry standards but also strives to offer the best quality TMT products to the would-be executed structural developments all across the country

subsidiary of the Radha Group, is emerging as an industry leader in providing top-quality steel for construction projects that demand colossal strength and durability. The inculcation of the German-designed quenching and tempering technology in the highly competitive manufacturing units offer a robust platform for manufacturing the classic steel pieces for constructions that ultimately become the

most reliable structures in the towns they are developed in.

Radha TMT manufactures TMT Bars under the most stringent quality conditions to ensure the best quality. Moreover, the products manufactured by Radha TMT are also resistant to extreme weather conditions. The testing and quality control process conducted at the unit makes the manufactured products an ideal choice that

RADHA TMT
SSO STEEL BARS

offers utmost reliability with respect to strength, durability as well as suitability.

A RESOURCE SAVIOUR

Choosing Radha TMT for the fulfilment of construction requirements not only offers a sense of satisfaction in terms of quality and durability of structures, but also helps in the conservation of resources. The highly strong and extreme load-bearing capabilities of the TMT products have been playing a significant role in controlling the overall rate of steel consumption across the nation. The enormous tensile strength of the products makes them fit for all kinds of structures, be it dams, flyovers, bridges, or other construction projects.
